

Dear DEEP and GC3,

Your Nov. 27 meeting was very interesting. While modeling uncertainty and policy timing, down the road, are surely critical and have to ultimately be nailed down, the maximum midterm GHG reduction goal (55%) should be recommended at this time-given the unknown obstacles/delays the GC3 plan will face, legislatively and bureaucratically, in its execution. Please rise to the occasion and be bold.

Sincerely,  
James Root
